ICMR is willing to facilitate establishment of a full-fledged COVID-19 testing facility in all Government Medical Colleges and Private Medical Colleges (for private MCs: NABL accreditation for real-time PCR of RNA viruses is required).

A laboratory will be considered fit for assessment by ICMR when the following basic requirements will be available:

1. Real Time RT-PCR machine which is calibrated and functional.
2. Biosafety Level 2 cabinet which is calibrated and functional.
3. Cold centrifuge
4. Pipettes, RNA extraction kits, plasticware and other basic consumables.
5. Autoclave for sterilizing the waste.
6. Staff is available and has some previous experience of work using real-time PCR machine.
7. Biomedical waste management policy in place and understanding on segregation of infectious waste.

Once the above requirements are met, only then ICMR may be approached for approval.

Steps of Approval from ICMR:

<table>
<thead>
<tr>
<th>Categories</th>
<th>Nomenclature</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Category 1</strong>: Any of the above-mentioned requirements 1-7 are not met.</td>
<td>Cannot be considered in the present form. State Govt. support is required for meeting the above criteria.</td>
</tr>
<tr>
<td><strong>Category 2</strong>: All the above requirements 1-7 are fulfilled.</td>
<td>Under review</td>
</tr>
<tr>
<td><strong>Category 3</strong>: Staff trained at nearest VRDL and the trainer recommends the lab.</td>
<td>Approved</td>
</tr>
<tr>
<td><strong>Category 4</strong>: First test is run independently and successfully by the lab and results are shared with ICMR.</td>
<td>Functional Lab. Fit to start independent testing</td>
</tr>
</tbody>
</table>

*As and when the labs will move from category 1 to 2, ICMR will consider facilitating a COVID-19 testing facility.*
