- Separate dishes and utensils to be used for serving foods to the quarantined person and those to be cleaned by the persons themselves to prevent spread of infection among others.
DISINFECTION PROCEDURE FOR PREVENTION OF COVID-19 IN PUBLIC PLACES

Corona virus spreads from person to person directly through respiratory droplets produced when an infected person coughs or sneezes. People also become infected by touching surfaces contaminated with corona viruses by droplets generated while coughing or sneezing and then touching their mouth or nose or eyes.

Respiratory Hygiene, Hand Hygiene and cleaning and disinfection of surfaces frequently touched by hands are essential strategies for the prevention and transmission of COVID-19.

Disinfection of floors and surfaces frequently touched by hands such as seats, hand rails, straps in trains and buses, door handles, lifts, hand rails, chairs, tables, ticket counters, in the shopping malls, hotels, cinema theatres, marriage halls, seats in trains and buses will certainly help in interruption of transmission to a larger extent.

a. Disinfections for surfaces frequently touched by hands

- Disinfection of seats, chairs, door handles, ticket counters and hand railings in cinema theatres should be cleaned with Lysol spray after every show.
- In buses and trains, the door handles, straps, hand rails and seats should be cleaned with Lysol periodically after every trip.
- In hotels, lodging houses and marriage halls, Lysol should be sprayed on the surfaces frequently touched by hands should be done periodically, as many times as possible.
Lysol spray for disinfection

Lysol IP (50% Cresol and 50% Liquid soap)

- Bus stands, railway stations, buses, trains, vehicles, malls, cinema theatres, marriage halls, etc.,
  - 2.5% Lysol (1 litre of Lysol in 19 litres of water)
- Hospitals, clinics and ambulances
  - 5% Lysol (1 litre of Lysol in 9 litres of water)

As per the concentration of Lysol in the market, required concentrations can be prepared.

b. Disinfections for floors/ambulances

  - 1% Hypochlorite solution should be used for cleaning the floors

Sprayers

Different kinds of sprayers including power sprayers and water wash pumps can be used for spraying, and cleaning can be done by wet mopping.
